Reasons For Allowance

The following is an examiner's statement of reasons for allowance: claim 1 defines a sewing method for sewing a tubular article. The method includes the steps of flattening the end of the article and feeding this between two laminas with a protruding portion beyond the laminas. Advancing the article along a guide path and sewing a first stitch line while advancing the article through the sewing machine. Disengaging the sewing head and retracting the article along the guide path upstream from the sewing machine and advancing the article through the path, again for performing a second stitching of the article while advancing the article. Disengaging the article from the sewing machine thereafter. Claim 6 defines a sewing apparatus for closing the end of the article comprising two mutually facing laminas with a passage therebetween and a sewing apparatus for forming a stitching on the article. A moving means is provided for moving the article first through the sewing machine for the first stitching and then moving the article upstream from the sewing machine along the path and moving the article through the sewing machine for forming a second stitching. The dependent claims further limit the method and apparatus for stitching the article of the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
